

Mobile extraction unit

The KUNZER WK MAG7500 is a folding, mobile and powerful extraction unit. It enables professional, dust-free painting and filling in compliance with the applicable occupational health and safety regulations.

With its high suction capacity of 7,500 m³/hour, it can be used not only for extracting paint mist and polishing dust, it is also suitable for extracting heavier particles when working with fillers, primers and priming.

The working area is optimally illuminated by the integrated lighting and when not in use, the extraction unit can be folded away to save space.

Wide range of applications in paint shops or workshops for Smartrepair, partial paint jobs or polishing work directly on the vehicle without lengthy reworking due to paint mist, polishing or polishing dust.

Technical data:

- Suction capacity: 7,500 m³/hour.
- Filter area: 1.7 m² + 1.5 m² = 3.2 m²
- Engine power: 1.5 Kw (220V)
- Lighting: 2 x LED, 60W, 90 cm
- Operating noise: 65 dB
- Weight: 170 kg
- Dimension (LxWxH): 1.0 m x 0.8 m x 2.0 m (folded)
