

EUROLUB SCHEIBENENTEISER

Description

Removes ice and hoar frost from all windows. Spraying in the evening largely prevents the windows from freezing over during the night. Does not damage paintwork, plastics or rubber.

Remove snow and loose ice. Turn the spray nozzle to 'Spray' and spray onto the icy windows from a distance of approx. 15 cm, moving from top to bottom. Hold the bottle upright whilst spraying. Repeat the process if there is heavy ice build-up.
